

Pellet Beypel

High-energy efficiency pellets from Beypel, originating from Turkey, made from 100% coniferous wood.

They have a high calorific value for better energy performance and a low ash and dust content that reduces equipment maintenance needs.

Beypel has been active in the energy sector since 1994. Since 2020, it has been producing the cleanest pellets in the industry. Beypel's production capacity exceeds 15,000 tons per year.

- ✓ Quality Production
- ✓ High production capacity
- ✓ Clean Product
- ✓ Advanced distribution network in Greece in collaboration with Renelux Commodities

Certification

The product is certified by the producer according to ENplus A1 (PETKOK KOMUR - TR 014).

Specifications

Calorific Value:	≥ 4,6 kWh/kg (Net)
Ash Content:	≤ 0,70 %
Pellet Length:	3,15 ≤ L ≤ 40 mm
Pellet Diameter:	6 +/- 1mm
Moisture Content:	≤ 10,0 %
Density:	600 ≤ BD ≤ 750 kg/m ³
Ash Softening Temperature:	≥ 1200° C
Fine Particles (<3,15mm):	≤ 0,5 %
Mechanical Durability:	≥ 98,0 %

Packaging & Logistics

Retail Packaging:	15 kg bags
Bags per Pallet:	70
Pallet Weight:	1050 kg
Pallet Dimensions:	120 * 100 * 180cm (LxWxH)
Transportation:	40' container (40ft)
Pallets / 40ft:	23
Quantity / 40ft:	24.15 tons
Bags / 40ft:	1610

Order & Delivery	
Minimum wholesale order:	One (1) 40ft Container
Delivery:	Delivery to the customer's warehouse or to Renelux's central warehouse
Storage:	Option to store the customer's order in Renelux's central warehouses
Partial deliveries:	Ability to manage the customer's order in partial deliveries from Renelux's central warehouses

Made from 100% coniferous wood (virgin wood and non-chemically treated wood residues).

Advantages

Pellets certified according to ENplus offer the following advantages:

- ✓ Ensure better operation of boilers or stoves, resulting in reduced maintenance costs.
- ✓ Are more economical compared to mineral fuels.
- ✓ Are easy to transport and store.

Import and distribution in the Greek market:
