

Pellet Pinocella

Top-quality wood pellets from Pellet & Pallet Industry, originating from Tunisia, made from 100% softwood.

These pellets have high calorific value for improved energy efficiency and a low ash content that reduces equipment maintenance needs.

Pellet & Pallet Industry's certified pellets are distributed to Mediterranean countries such as Italy, Spain, Southern France, and receive the best reviews from customers. This has ignited a strategy of continuous improvement, resulting in a product that exceeds the typical certification system requirements today.

Certification

The product is certified by the producer according to ENplus A1 (Pellet & Pallet Industry - TN 002).

Specifications

Pellet Diameter:	6 mm
Pellet Length:	$3,15 \leq L \leq 40$ mm
Density:	$600 \leq BD \leq 750$ kg/m ³
Ash Content:	$\leq 0,70$ %
Mechanical Strength:	$\geq 98,0$ %
Calorific Value:	$\geq 4,6$ kWh/kg
Moisture Content:	$\leq 10,0$ %

Packaging & Logistics

Retail Packaging:	15 kg bags
Bags per Pallet:	90
Pallet Weight:	1350 κιλά
Pallet Dimensions:	114 * 114 * 180cm (LxWxH)
Transportation Method:	40' container (40ft)
Pallets / 40ft:	20
Quantity / 40ft:	27 tons
Bags / 40ft:	1800

Made from 100% softwood, including virgin wood and non-chemically treated wood residues.

Order & Delivery	
Minimum wholesale order:	One (1) 40ft Container
Delivery:	Delivery to the customer's warehouse or to Renelux's central warehouse
Storage:	Option to store the customer's order in Renelux's central warehouses
Partial deliveries:	Ability to manage the customer's order in partial deliveries from Renelux's central warehouses

Advantages

Pellets certified according to ENplus have the following advantages:

- ✓ Ensure better operation of the boiler or stove, resulting in reduced maintenance costs
- ✓ Are more cost-effective compared to fossil fuels
- ✓ Are easy to transport and store

Import and distribution in the Greek market:
